THE POWER OF **CONNECTED**

We are pleased to announce the on-demand estimated time enroute (ETE) computation with Professional Flight Management Inc. (PFM) operations management services. This is available for all active GoDirect Flight Planning and PFM subscribers.

On-demand ETE computation is a service provided by GoDirect through the PFM applications, that computes optimized flight plans and transmits the ETE back to the PFM system. This information is then used in the trip schedule to provide more accurate trip planning.

To take advantage of this integrated offering you must be an active GoDirect Premium Flight Planning and PFM subscriber. Not set up today? Contact our team via email [FlightServices@Honeywell.com](mailto:FlightServices@Honeywell.com)

Our Honeywell Flight Services representatives will assist to help you get started!

Thank you,  
Honeywell GoDirect Team
